

SENTINEL+ UV

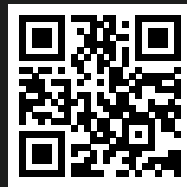

Sentinel+ UV is our premium anti-reflective coating with UV protection. The Sentinel coating family also includes Sentinel and Sentinel+. The coating is available in green, blue, and gold variations – the only UV coating available in multiple colors.

This premium Light Enhancing Technology is applied using a process that makes it extremely scratch resistant and incredibly durable. This coating provides all-day comfort and a backside UV treatment for reduced glare.

LIGHT WAVE TRANSMITTANCE

With Sentinel+ UV, there is a 98% transmission of visible light to your eyes; that's an 8% increase compared to the leading competitors!

Sharp, clear, crisp vision and healthy eyes are essential qualities to maintain your busy lifestyle with comfort and ease.

Light Enhancing Technology provides the ideal level of comfort and contrast with less glare, simultaneously improving your look by eliminating reflections on the lens and allowing people to clearly see your eyes. This revolutionary coating is easy to clean, and resists dirt and fingerprints so you don't have to clean your lenses as often. By blocking 100% of UV-A and UV-B light, you can protect your eyes from damaging sun exposure. Experience clear vision minus the glare from indoor lights, computer screens, and night driving with Sentinel+ UV.
